Tom,

SF had very limited role in providing consultation to RCRA Division, Georgia Pacific, the Arkansas Department of Health, and ATSDR. We did provide some input on conference calls last summer. It is our understanding that air monitoring was conducted by Georgia Pacific and we didn't get any data for our review. Therefore, we don't have any input at this moment.

Ben

Subject: Data for Crossett, AR

All -- Region 6 is working with the ORD to collect data and information to determine if a cumulative risk assessment can be conducted for the community of Crossett, Arkansas, as part of the Making A Visible Difference (MVD) in Communities effort. The assessment will require collecting a significant amount of data from numerous Region 6 programs as well as State environmental and health agencies.

Each Region 6 division is asked to provide the below-listed data based on your respective programs. Some items may require coordination with your Arkansas counterparts. I ask that you **provide any relevant data, reports, and information to me by September 16, 2014**. A copy of the Crossett Action Plan that was used during the discussions with ORD is attached for your reference. Thank you in advance for your support of this important effort.

Data Collection for Cumulative Risk Assessment – Georgia-Pacific LLC and Crossett, Arkansas

1. Title V air permit monitoring data (in particular, volatile organic compounds in detail)
2. NPDES monitoring data
3. TMDL data/DO monitoring/WET testing

4. WET testing in-stream concentration
5. Rationale for the designation of Coffee Creek
6. Ecological monitoring/testing data (fish and wildlife)
7. Incidence data on adverse health rates (cancer, stroke, obesity, smoking, asthma/respiratory, etc.)

Thanks,

Tom
